

ABDELMOUNAIM DIB

AI Engineer/Data Scientist Student

About Me

Passionate AI engineering student with a strong background in mathematics, software development, and artificial intelligence. Adept at building innovative solutions across web, mobile, and AI domains. Eager to apply knowledge and contribute to impactful projects.

07-82-74-77-31

Mounaimdib2019@gmail.com

Belfort, Harrach, Algiers

Language

- Arabic (Native)
- English (Fluent)
- French (Fluent)

Expertise

- Machine Learning & Deep Learning
- Data Mining & Predictive Modeling
- Full-Stack Development (Web/Mobile)
- Algorithms & Data Structures
- Team Leadership & Project Management

Experience

Health care web/mob Development

MeDZ - Emassaha

2023 - 2024

Built a responsive medical assistance website using HTML, CSS, JavaScript, PHP, Node.js

Created a mobile app focused on health and wellness services.

Clustering & Prediction of Football Players

Data Mining Project

DEC-2024

Applied clustering algorithms and predictive modeling techniques to predict player similarities and identify their optimal positions on the pitch.

Industrial RAG System

KABAS Foundation

FEB-2025

Developed a Retrieval-Augmented Generation (RAG) system for industrial data solutions during our group project module.

Education

Kouba Mathematics High School

Mathematics Baccalaureate (Score: 17.18/20)
2019-2022

National Higher School of Artificial Intelligence (ENSIA)

Engineering Degree in Artificial Intelligence and Data science
2022 – Present

Skills Summary

Development (Web/Mobile)		75%
Machine Learning & Data mining		70%
Programming (C++, Python, java)		75%
